## DETAILED ACTION

### *Allowable Subject Matter*

1. An "Amendment" was received on March 22, 2006, in response to Office Action of September 19, 2005. Claims 1, 6-8, and 11 have been amended, as indicated.
2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. With respect to amended independent claim 1, prior art fails to disclose a method of manipulating mesoscopic particles, comprising the steps of: providing a beam of light whose wavefronts are at least approximately planar; focusing the beam of light with a lens with a sufficiently large numerical aperture to create a single-beam gradient-force optical trap having a transverse optical gradient component; using the optical trap to exert forces transverse to the optical axis of the beam of light, and applying that transverse force to transport the particles.
5. With respect to independent claim 9, prior art further fails to disclose a method of correcting aberrations that appear in an optical train defining an optical trapping system, comprising the steps of: locating an optical axis onto a monitoring device, establishing the geometry of the optical trapping system; locating the optical axis on a spatial light modulator; measuring the effective input aperture relative to the optical axis on the spatial light modulator; measuring any aberrations that appear in the optical train; and correcting the measured aberrations that appear in the optical train.

Claims 2-8 and 10-20 are allowed by virtue of their dependencies on the independent claims 1 and 9.

***Conclusion***

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Statement of Reasons for Allowance".
